Nuume Gummies

90-Day Social Media Game Plan

Awareness → Education → Conversion

PREPARED BY A SOCIAL MEDIA MARKETING STRATEGIST

THE BRIEF

The Original USP Was Generic.

"Nutritional Values & Taste" is what *every* gummy brand says. It gives customers zero reason to choose Nuume over anyone else.

We needed USPs that are **specific, defensible, and story-worthy.**

USP Comparison Content

"Why choose us" carousels that contrast 7 USPs against generic gummies — confidently, not aggressively.

Founder / Brand Story

Why this brand was built around bio-availability, clean sourcing, and true vegan. Deepens trust before the buy.

Offers & Conversion Nudges

Limited-time deals, bundle promotions (daily dose packs), repeated CTAs across all formats.

FAQ / Objection Handling

"Is it really sugar-free?" "How is this different?" — pre-empt doubts using Phase 2 USP knowledge.

ALWAYS ON

Competitor Monitoring

Not a one-time audit. A weekly recurring task across all 90 days — because competitor messaging, offers, and angles will shift.

Competitor activity informs Phase 1 relatability hooks, Phase 2 differentiation angles, and Phase 3 comparison framing — all in real time.

WHAT WE'RE WATCHING FOR

Spot gaps

Audience segments or USPs competitors aren't addressing — claim that space first.

Avoid duplication

Don't echo content that's already saturating the category feed.

Sense-check claims

Keep Phase 3 comparison content accurate and legally defensible.

THE PLAN IN THREE LINES

Get seen.
Get understood.
Get bought.
