01 Brand Analysis

Understanding Glemsil's DNA, products, and positioning

Brand Overview

Glemsil is India's first intelligent, climate-adaptive skincare system, created by a doctor who saw firsthand that Indian skin needs formulations built for Indian weather, melanin biology, and sensitivity patterns. The brand rejects harsh, high-percentage single actives in favor of gentle multi-active systems that deliver results without irritation.

Category

Premium Skincare
Climate-Adaptive Science
Dermatologist-Created

Core Philosophy

Indian Climate + Indian
Skin Science: gentle multi-
active systems over harsh
single actives

Hero Technology

Nano Niacinamide
Encapsulated UV Filters
Irritation-Controlled Actives
Barrier Repair Support

Brand Stage

Pre-Launch / Early Launch
3-product ecosystem ready
Digital-first GTM strategy

The 3-Step Routine: Brighten, Balance, Protect

Each product is engineered for Indian climate and melanin-rich skin. Together, they form a complete system.

STEP 1

Intelligent Brightening Serum

Brightening Intelligence™

Key Actives

5% EAA + 2% Alpha Arbutin + 2% Nano
Niacinamide + 2% Glycolic Acid

Core Benefit

Fades dark spots, reduces tanning, smooths
texture, strengthens barrier

STEP 2

Climate-Adaptive Gel-Cream

Climate-Adaptive Moisture Engineering™

Key Actives

3% Niacinamide + 1% Pentavitin + 1% Gotu Kola
+ Squalane + LMW HA

Core Benefit

72h hydration, oil balance, barrier repair,
matte-velvet finish

STEP 3

Invisible SPF 50 PA++++

Intelligent UV Defense™

Key Actives

Encapsulated UV Filters + Lisi-Gel Technology +
Sweat-Resistant Film

Core Benefit

Zero white cast, non-sticky, sweat-resistant,
semi-matte finish

SWOT Analysis

S

Strengths

- Doctor-created credibility & trust
- Genuinely differentiated formulation science
- Climate-adaptive positioning (unique in India)
- Complete 3-step routine ecosystem
- Silicone-free, non-sticky, melanin-safe

W

Weaknesses

- Zero existing digital footprint / social proof
- No influencer or KOL relationships yet
- No customer reviews or UGC library
- Brand awareness at absolute zero
- No funded media budget confirmed

O

Opportunities

- 'Indian skin science' narrative is underserved
- Short-form video (Reels/Shorts) dominates beauty
- Dermatologist-creator content is high-trust
- Monsoon/summer seasonality = built-in hooks
- D2C skincare audience is highly engaged

T

Threats

- Minimalist & Derma Co have massive headstart
- Category is crowded with funded competitors
- Ingredient-aware audience may question % claims
- Premium pricing in price-sensitive market
- Influencer fatigue in skincare space

Current Digital Audit

Platform	Current Status	Key Gap	Priority
Website	glemsil.com (Live)	No blog, limited SEO, no email capture funnel	HIGH
Instagram	New / Not Active	Zero content, zero followers, no Reels presence	HIGH
YouTube	No Channel	No video content; highest-ROI gap in skincare	HIGH
Facebook	Not Active	No page or community presence	MEDIUM
LinkedIn	Not Active	Missing founder/doctor credibility positioning	LOW

02 Competition Analysis

Minimalist, Derma Co, Dot&Key, Dr. Sheth's, La Roche Posay

Competitive Landscape

Competitor	Strength (What They Do Well)	Vulnerability (Where They Fail)
Minimalist 1.8M+ IG	Ingredient-led branding, transparency playbook, massive community, strong SEO	Clinical/cold tone, formulas not India-specific, irritation complaints
Derma Co 700K+ IG	Aggressive paid marketing, doctor endorsements, wide SKU range, Amazon dominance	Trust issues (percentage marketing), generic formulations, heavy textures
Dot&Key / Foxtale 500K+ IG	Fun Gen-Z branding, packaging appeal, Reels-first strategy, quick trend adoption	Style over substance, weak science storytelling, no climate positioning
Dr. Sheth's 200K+ IG	Indian-skin focus, Ayurvedic + modern blend, loyal niche community	Small scale, inconsistent content cadence, limited category presence
La Roche Posay 100K+ IG (India)	Global dermatology credibility, clinical trust, pharmacy distribution	Premium pricing, not India-adapted, minimal local content, low engagement

Competitive Whitespace: Where Glemsil Wins

1

Climate-Adaptive Narrative

No competitor positions formulations specifically for Indian heat, humidity, and pollution. Glemsil's entire brand thesis is built here. This is uncontested territory.

2

Doctor-Founded Credibility (Not Endorsed)

Derma Co uses doctor endorsements. Glemsil IS doctor-created. That distinction is powerful: 'I made this because I treated these problems' vs. 'A doctor recommends this.'

3

Texture as a Conversion Lever

No brand is centering 'non-sticky, lightweight, humidity-proof texture' as a primary message. In India, texture = repeat purchase. This is a content goldmine for demo videos.

4

Gentle Science vs. Percentage Wars

Minimalist and Derma Co compete on '10% Niacinamide' or '20% Vitamin C.' Glemsil can own the counter-narrative: multi-active systems that work WITHOUT irritation.

03 Social Media Strategy

Platform priorities, brand voice, personas, and KPIs

Platform Strategy & Prioritization

Instagram

P0

Primary Brand + Commerce

Reels (texture demos, before/after, science bites), Carousels (ingredient education), Stories (polls, Q&A, BTS)

5-6x/week

YouTube

P0

Authority + Search

Doctor-led tutorials, routine guides, ingredient deep-dives, myth-busting, seasonal skin series

2x/week

Facebook

P1

Community + Retargeting

Skincare community group, customer stories, shared Reels, retargeting audiences

3x/week

LinkedIn

P2

Founder Story + B2B

Doctor-founder thought leadership, brand-building journey, D2C insights

1-2x/week

Target Audience Personas

Priya, 24

The Ingredient-Aware Millennial

Researches every active before buying. Follows skincare creators on IG. Currently using Minimalist but irritated by high-% actives. Wants gentle science that actually works. Tier 1 city, WFH professional.

Platforms: Instagram, YouTube

Sneha, 30

The Busy Professional

Needs a simple, effective routine. Hates sticky sunscreens and heavy creams. Wants 'apply and forget' products for Mumbai humidity. Willing to pay premium for comfort + results.

Platforms: Instagram, Amazon

Dr. Meera, 35

The Dermatologist-Recommender

Looks for brands she can recommend to patients. Values clean formulation, scientific backing, and Indian-skin focus. Influential in her patient network and on LinkedIn.

Platforms: LinkedIn, YouTube

Brand Voice & Tone Guidelines

Scientist, Not Salesperson

Lead with 'why it works' not 'buy now.' Explain Nano Niacinamide absorption, EAA stability, encapsulated filters. The audience respects education.

Indian Skin Advocate

Speak directly to melanin-rich skin, humidity, tanning, PIH. Never use 'fairness' or 'lightening.' Use 'brightening,' 'clarity,' 'evening.' This is non-negotiable.

Comfortable, Not Preachy

The brand should feel like a friend who also happens to be a doctor. Warm, knowledgeable, never condescending. Celebrate Indian skin, don't fix it.

Proof Over Promise

Show texture tests in humidity. Film absorption speed. Post results timelines. Let the product prove itself on camera rather than making claims in copy.

KPIs & Success Metrics (6-Month Targets)

05 Launch Calendar

90-day phased rollout for social media activation

90-Day Launch Phases

Phase 1: Foundation

Weeks 1-4

- Profile optimization across all platforms
- Content bank: 40+ assets (10 Reels, 15 carousels, 15 statics)
- Brand voice guide & visual template system
- Hashtag strategy & SEO keyword mapping
- First 12 posts: product reveals + founder intro
- Influencer shortlist (30 micro-creators)

Phase 2: Momentum

Weeks 5-8

- Full posting cadence activated (12x/week)
- YouTube launch: 4 science-led tutorial videos
- IG Reels push: 4 texture/demo videos per week
- First influencer seeding round (10 creators)
- Doctor's Desk series begins (weekly)
- Community engagement: 50+ daily interactions

Phase 3: Scale

Weeks 9-12

- Launch Campaign 1: #TextureTruth Challenge
- Launch Campaign 2: Monsoon Skin Series
- First paid amplification on top organic posts
- UGC collection & repost engine activated
- Monthly performance audit + strategy pivot
- Influencer round 2 (20 creators)

Weekly Content Cadence (Steady State)

Day	Instagram	YouTube	Facebook	LinkedIn
MON	Carousel: Science	-	Shared Carousel	-
TUE	Reel: Texture Demo	Tutorial Video	Community Post	-
WED	Story: Q&A / Poll	-	UGC Repost	Founder Insight
THU	Reel: Before/After	Shorts	Product Education	-
FRI	Carousel: Routine	-	-	Case Study
SAT	Reel: Trending/Fun	-	Engagement Post	-
SUN	Story: BTS/Personal	-	-	-

Total: ~12 posts/week across 4 platforms | Reels/Shorts: 4x/week | Long-form YouTube: 1-2x/week

06 Campaign Architecture

4 structured campaigns designed for organic growth

Campaign 1: #TextureTruth Challenge

Objective: Prove Glemsil's texture superiority through real-world video demos and spark UGC

Concept

Challenge creators and customers to film Glemsil's absorption on their skin in Indian humidity. 'Watch it disappear in 3 seconds.' Compare to their current product. Non-sticky in 35C heat = visual proof.

Content Flow

Week 1: Glemsil launches hero demo Reel (founder applies in Mumbai rain)

Week 2: Seeded creators post their #TextureTruth comparisons

Week 3: Audience entries + daily reposts of best submissions

Week 4: Winner announcement + 'Top 10 Texture Tests' compilation

Amplification

Seed 15 micro-influencers (skincare, lifestyle, dermatologists)

Paid boost on hero launch Reel (Tier 1+2 women 20-35)

Cross-post to YouTube Shorts for search capture

WhatsApp status format for organic sharing

Target KPIs

300+ UGC video entries

750K cumulative Reel views

2K new Instagram followers

500+ product page visits from social

50+ saved Reels (high-intent signal)

Campaign 2: #MonsoonSkinGuide Series

Objective: Capture seasonal demand; position Glemsil as THE monsoon skincare brand

Concept

7-day Reel series (1/day) covering every monsoon skin problem: fungal acne, humidity breakouts, sunscreen pilling in sweat, tanning through clouds, sticky product syndrome, barrier damage from AC-to-heat cycling, waterproof SPF myths.

Content Flow

Day 1-7: One problem-solution Reel daily with Glemsil product
Parallel: 'Monsoon Skin Survival Kit' carousel (routine guide)
Stories: 'Rate your monsoon skin struggle' poll series
Finale: '7 Days of Monsoon-Proof Skin' compilation + giveaway

Amplification

SEO play: YouTube versions targeting 'monsoon skincare routine India'
3 dermatologist-creators co-creating 1 episode each
Pinterest pins for 'monsoon skincare tips' (evergreen search)
Email blast to waitlist/early customers

Target KPIs

500K cumulative series views
20% lift in 'monsoon' keyword traffic to glemsil.com
3K new followers across platforms
100+ saves per Reel (strong intent signal)
200+ comments per episode

Campaign 3: The Percentage Myth

Objective: Own the counter-narrative to 'higher % = better results' and establish thought leadership

Concept

A bold content series directly challenging the ingredient-percentage arms race that Minimalist/Derma Co popularized. Doctor-founder explains why multi-pathway gentle systems outperform single high-% actives. Backed by dermatology science, not marketing.

Content Flow

Episode 1: 'Why 10% Niacinamide Is Irritating Your Skin' (Reel)
Episode 2: 'Vitamin C: Stable vs. Strong' (YT deep-dive)
Episode 3: 'The Gentle Science Manifesto' (Carousel)
Episode 4: 'Multi-Active vs. Single-Active: Real Results' (Reel)
Weekly for 4 weeks + ongoing as a recurring series

Amplification

Tag/reference competitor claims without naming brands
Dermatologist collaboration: 2 doctors co-sign the science
LinkedIn thought leadership posts by founder
Reddit/Quora seeding for SEO (long-tail skincare queries)

Target KPIs

400K cumulative views (controversy drives engagement)
1K+ comments (debate = algorithm fuel)
5K new followers (thought leadership attracts loyalists)
Top 3 Google ranking for 'niacinamide percentage' queries
Establish Glemsil as the 'gentle science' authority

Campaign 4: Doctor's Kitchen (Founder Series)

Objective: Build deep trust through founder-led content; humanize the brand's science story

Concept

Weekly video series where the doctor-founder answers real skin questions from the audience, debunks viral skincare trends, explains why Glemsil formulations work the way they do. Shot casually (not clinical). Builds the parasocial trust that drives D2C skincare purchases.

Content Flow

Episode 1: 'Why I Created Glemsil' (origin story Reel)
Episode 2: 'What I Actually Use on My Skin' (routine reveal)
Episode 3: 'Your DMs, My Answers' (community Q&A)
Episode 4: 'Skincare Trends I'd Never Recommend'
Ongoing: weekly, evergreen, audience-driven topics

Amplification

Clip into 3-4 Shorts/Reels per long-form episode
LinkedIn repurpose for professional credibility
Podcast guest pitches (The Skincare Edit, etc.)
Email newsletter excerpts driving to YouTube

Target KPIs

10K YouTube subscribers within 6 months
5K avg views per episode (growing 20% MoM)
Highest save-to-reach ratio of any content series
Founder becomes a recognized skincare voice
30%+ of site traffic attributed to founder content

Organic Growth Flywheel

Each node feeds the next. The flywheel compounds reach without increasing spend.

07 Measurement & Reporting

What gets measured gets managed

Reporting & Review Framework

Weekly

- Post-level performance: reach, ER, saves, shares
- Top/bottom 3 posts analysis
- Follower growth tracker
- Content production status

Social Media Manager

Bi-Weekly

- Campaign KPI tracking vs. targets
- Content calendar review + adjustments
- Competitor activity scan
- Influencer pipeline update

Brand Strategist

Monthly

- Full performance report with insights
- Audience demographic analysis
- Content bucket ROI breakdown
- Strategy pivot recommendations
- Website traffic attribution

Strategy Lead

Quarterly

- Brand health: SOV, sentiment, share of search
- Campaign retrospective + learnings
- Next quarter plan + calendar
- Budget review + reallocation
- Influencer program audit

Account Director

What We Need From You (Next Steps)

Brand Guidelines

1

Colors (hex codes), heading font, body font, logo files in all formats, icons. Currently blank in onboarding form.

Product Photography

2

High-res product shots, flat lays, texture close-ups, swatches on Indian skin tones. Essential for content bank.

Founder Video Availability

3

Doctor's Kitchen series requires 2-3 hours/week of founder filming time. Can be phone-shot, casual setting.

Social Account Access

4

Create or grant access to IG, YT, FB, LinkedIn business accounts. Admin access required for publishing.

Budget Confirmation

5

Monthly paid amplification budget (recommended minimum: 50K INR/month for boosted organic + micro-influencer seeding).

Approval Process

6

Define turnaround time for content approvals (recommended: 24h max). Weekly batch approval preferred.

Indian Skin Deserves Indian Science.

Let's build the brand that proves it.

Strategy is only as good as its execution.

This plan is built to move fast, measure honestly, and compound results.
